## Medical Conditions

PLEASE NOTE: *The content on this page is for information only.*

*Parents/Guardians are expected to review and update medical information with the school on an annual basis.*

### Life Threatening Allergies

*Anaphylaxis* is a serious allergic reaction. It can be life-threatening. Food is the most common cause of anaphylaxis, but insect stings, medicine, latex, or exercise can also cause a reaction. The most common food allergens are peanuts, tree nuts, and seafood, egg and milk products.

The TDSB has created a policy and procedure to further support *Sabrina's Law* introduced in January 2006 and to take care of our students at risk of anaphylaxis. Under *Sabrina's Law*, the TDSB has developed:

- Strategies to reduce exposure to allergens.
- Procedures to communicate with parents, students and staff about life-threatening allergies.
- Regular training opportunities for all staff to deal with life-threatening allergic reactions.
- Emergency procedures to cope with the anaphylactic student, including readily-accessible treatment.

Each school also has its own individual plan for each student at risk of anaphylaxis, which includes maintaining a file of the student's medications and emergency contacts.

If your child suddenly becomes ill or has an allergic reaction, school staff will take the appropriate action. Please ensure your school has the most up-to-date emergency contact information. If your child has life-threatening allergies, or if your child needs to be given special medication throughout the day, please speak with your principal to discuss arrangements. For more information, please refer to TDSB Operational Procedure PR563 – Anaphylaxis:

<http://www2.tdsb.on.ca/ppf/uploads/files/live/100/282.pdf>

### Asthma

*Asthma* is a very common, chronic (long term) lung disease that can make it hard to breathe. Asthma can be fatal without proper management and access to medications.

The TDSB has developed operational procedures to support the implementation of *Ryan's Law (Ensuring Asthma Friendly Schools), 2015*, which includes:

- Creating a positive environment for students with asthma.
- Special considerations for students with additional needs.
- Roles and responsibilities for elementary and secondary schools.
- Parents will provide school staff with up-to-date information about their student's asthma. Information should be provided to the school at the start of each school year.

For more information, please refer to TDSB operational procedure PR714 – Asthma Management:

<http://www2.tdsb.on.ca/ppf/uploads/files/live/98/1764.pdf>

### Diabetes

*Diabetes* is a serious disease that impairs the body's ability to use food properly. In students with diabetes, insulin is either not produced or does not work efficiently. Without insulin, glucose builds up in the blood stream and the body begins to break down fat to be used for energy. The body creates ketones and an excess of this material can result in severe complications that can result in coma and/or death. Effective practices in managing Diabetes in Schools include:

- Blood glucose monitoring/insulin injection.
- Proper timing of meals and snacks to maintain proper blood sugar levels. Students need the opportunity to eat all meals and snacks fully and on time.
- Emergency food supplies that include oral glucose, juice and/or fast acting sugar should be available in other locations in the school.
- Parent/guardian/caregiver provides, maintains, and replenishes all food and necessary diabetic supplies.
- The development of a Diabetes Management Plan for each student who is identified with diabetes. The plan will be implemented in accordance with the medical requirements for each student.

For more information, please also refer to the TDSB operational procedure PR607 – Diabetes Management:
