Come and learn all about York Memorial Collegiate and our multiple programs

Specialized Programs

RUSH: Roadmap to University Success with Honours

- This program focuses on developing the essential skills of **critical thinking, creativity, initiative, time management and communication** while infusing **Pre-Advanced Placement curriculum** into **ALL** subjects taken in grades 9 and 10.

Currently the largest and most
successful Pre-AP & AP public school
in Ontario

Advanced Placement: These courses occur in grades 11 and 12 and are actually first year university courses that students can take while still attending high school.

- This program sees students taking first year university courses while still in high school. A major component of these courses include standardized AP exams that are written in May and if the students do well enough on these exams they are granted first year university credits while still in high school. York Memorial offers more AP courses (16) and has more students writing AP exams (over 350 exams in May 2017) than any other public school in all of Ontario. Any student in grades 10, 11 and 12 is welcome to contact York Memorial's guidance department if they are interested in taking Advanced Placement courses as part of their academic pathway. We do have spaces available in many of our AP courses for students interested in this wonderful opportunity.
- Please visit York Memorial's website (<http://www.yorkmemorial.ca>) or feel free to call at any time for more information.
