

December 8, 2017

Dear parent/guardian,

We wish to inform you that we have experienced a number of students who have become ill with flu-like symptoms (i.e., fever, nausea, vomiting, etc.).

Should your child(ren) present with any of these symptoms, you are strongly encouraged to keep them home until they feel better. This will help avoid the spread of germs and will likely help speed up their recovery. If your child has any of these symptoms and you are keeping them home, we ask that you please advise the office so that we can monitor the classrooms this is occurring in. We will then consider the need to bring in a task force to support our caretaking efforts in those specific rooms. The caretaking task force has already been called to help sanitize the kindergarten and grade 5 classrooms.

Thank you very much for your co-operation.

Sincerely,

Patricia Broderick

Principal
