Who I appreciate. (by Binh)

I appreciate the scientists that are trying to find a medicine to save people who have CODID-19. I also appreciate the animals because they can help the scientists know if the medicine that they made worked or not. Who I also appreciate is the workers who make masks because it helps other people to Spread the disease.

We must accept finite disappointment, but never lose infinite

Dear all the frontline workers,

Hi! My name is Sam. I really appreciate how you guys are working harder and harder everyday to save the earth from this pandemic. You guys are always there even though you're supposed to stay home. Some people dislike you guys but I don't think that's true. All of us are really thankful that we have you guys here to save us. Your guy's job isn't easy and I know that. You guys have the courage, you guys risk your lives to save us. You guys are role models to some kids like me and if in the future something happens, you guys are always here to save us. I know that in the future, someone will care for you just like you cared for us. You guys are always there when there's problems no matter how big or small. We respect you guys, we'll care for you guys just like you do to us.

Sincerely,

Sam
