

Crosstown LRT Project – Update, May 7, 2018

Over the weekend, TDSB staff has completed the installation of Plexiglas on all the windows that overlook the construction site as an additional safety measure. This includes windows in rooms number 108 (child care), 202 (JK/SK class and child care), caretaking office, 204 (Grade 2), 206 (Grade 2 class plus child care) and a few non-instructional classrooms.

Metrolinx has denied the Board's request to stop the construction until the temporary barrier is in place.

We share the community's concerns and we will continue to monitor the construction to ensure the health and safety of students and staff.

Please keep visiting the school website for regular updates.
