

### **Crosstown LRT Project – Update, June 1, 2018**

- We continue monitoring dust and noise levels on the regular basis. Overall, daily averages of noise levels and dust concentration are within the ranges normally expected in schools.
- Phase 2: due to the Fun Fair, we have rescheduled the installation of Plexiglas on the windows located on the north-east side for next weekend.

Please visit the [school](#) and [Crosstown LRT](#) websites for regular updates.
