

### **Crosstown LRT Project – Update, June 15, 2018**

- Last week, results of noise and dust monitoring showed concentration levels within the ranges normally expected in schools. We will continue monitoring dust and noise levels as needed to ensure the safety of students and staff.

#### **Phase 2:**

- The TDSB has finished the installation of Plexiglas on the windows located on the north-east side of the building.
- The submission of the scaffolding drawings for the north-east side is pending. We were advised by Metrolinx that Phase 2 (station piling operations) is expected to start on July 1, 2018.

Please visit the [school](#) and [Crosstown LRT](#) websites for regular updates.
