Crosstown LRT Project - Update

Phase 1

Metrolinx started the installation of scaffolding at the north-west today.

Construction is scheduled to start today, following the installation of scaffolding. As a result, you may notice heavy machinery on-site.

Phase 2

We expect for Metrolinx to submit the scaffolding drawings for the north-east side by May 25.

Phase 2 is expected to start as early as June 1, following the installation of scaffolding.

ECOH will continue to monitor dust and noise levels on a regular basis.

Please visit the [school](#) and [Crosstown LRT](#) websites for regular updates.
