

Hello new interns,

Welcome to Forest Valley! GET OUT WHILE YOU STILL CAN!

Just kidding, these next four months will probably be one of the best coop experiences you've had. In order to help give you a running start into this crazy cool workplace we have outlined some pro tips CORRECTION: we have outlined some FV Intern tips.

FV Intern tip #1: Make sure you read the instructions for the coffee maker. Water goes in LAST (who knew?)

FV Intern tip #2: Feed the fish or they will die. And when they do die blame it on Abed.

FV Intern tip #3: Don't forget to take out the solar panels.

FV Intern tip #4: Don't forget to put the solar panels AWAY.

FV Intern tip #5: Have fun while learning a lot!

Your time at Forest Valley will fly by. Make sure you open your mind to the wealth of knowledge that pours out of this place. This experience can be rewarding and enriching if you let it. With that, we leave you with this wrap up rap:

(to the tune of Fresh Prince)

In Waterloo born and raised / DP is where I spend most of my days

Maxin' relaxin' and studyin' all cool / applying to jobs outside of school

When a couple of people up to some good / Started interviewing in my neighbourhood

I got one little interview / My mom said 'YAY'

'You're going to North York to Forest Vall-AY'

So I pulled up to the Centre / 'round 7:30 or 8

And I thought to myself / 'I hope I'm not late'

I looked at my desk / I was finally there

Now I'm the new intern at Forest Valley

Best of luck,

Alex and Abed

Waterloo Interns, Spring 2015
