

If there is enough snow for all classes to safely participate, we will open our tubing hill for this Forest Valley led, highly structured tubing activity, which will last approximately 25 minutes.

- Forest Valley staff will decide on the morning of your trip if tubing is possible, after considering factors such as amount of snow, weather, etc.
- If our hill is open, we will automatically allocate your class time on the hill.
- We will also ask you and your volunteers to help monitor students as they await their turn on the hill, and to supervise students as they exit their tube and return to the safety cue.

As per OPHEA Guidelines, a properly fitting snow sport helmet certified by a recognized safety standards association will be provided, and is mandatory for all participants. Students may, if the parents/guardians choose, bring their own CSA approved snow sport helmet with them to Forest Valley.
