

Waste-free, it's the way to be!

Another container this size will be provided for compost (fruit and vegetable scraps) only.

This is about the **actual size** of the garbage container you will use at Forest Valley to dispose of all the garbage for your whole class.

What do you mean I'm not needed this week!?!

Try a waste-free lunch dress rehearsal the day before your trip and then, encourage everyone to **always** pack a waste-free lunch!

Thanks for helping the environment!

A blue-bin container will also be available for recyclable items.

Make your Lunch Waste-free

Everyday!

Reduce Garbage and Waste

- Buy in bulk and choose food with less packaging

Reuse

- anything that can be washed and used again

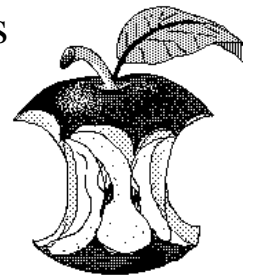

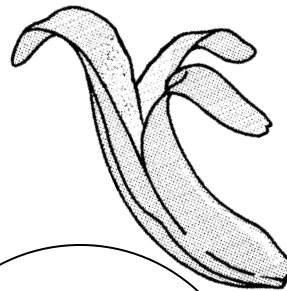

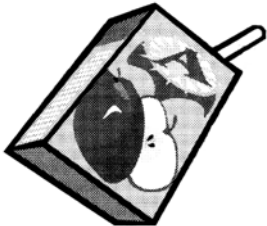

Recycle

- a good choice, but it still uses lots of energy

OR

Compost

- vegetable or fruit bits, no meats or sweets

Garbage

- an environmentally unfriendly choice!

No matter where you throw it out, it all goes to the same landfill site!

At Forest Valley we strive to learn from our actions and on how we can improve them to make the world a better place to live for all! The message we instill regarding garbage is both positive and hopeful. There is no emphasis on blame as we realize we all need to work together to solve our refuse dilemma.
