PRINCIPAL CORNER:

Did you know that Ms. Mihaly’s students work on a problem of the week each week and that many of our problems are created by students? This week our problem was written by Danish in Grade 5. There are many ways to solve a problem and you can see a variety of solution strategies posted outside our classrooms. Ask your child about what kind of problem solving they have been doing in their classroom or if they have recently created a problem for the school to solve.
