

Humberside CI Course Selection Procedures - January 2021

Course selection for the 2021-2022 school year will open on January 25th and close on February 22nd. Unfortunately, we are unable to present to students in person this year. The following Grade specific presentations will outline course selection considerations for all students. These will be shown to students in class January 18th or 19th and will be posted on the Guidance Google Classrooms, our HCI Guidance website and will be emailed to parents so the information is easily accessible.

Course selection happens on the myBlueprint website: www.myBlueprint.ca/tdsb. Students were encouraged to login before the winter break to ensure they had access. For login issues, the first step is to click on the "Forgot my password" button. If students continue to have difficulty, they will need to email their guidance counsellor for support.

Guidance counsellors will be available via Zoom each day from 1:00-1:45 for Q and A for up to 10 students a day each. Sign up for these sessions on the Guidance Google Classroom. We are still also having appointments with students which can also be booked via our Google Classroom (Class code:xi4d4db).

Course selection is a process and not a competition. Timetables and courses are not assigned on a first come first served basis. It is important for students to consult with their parents, teachers and counsellors when making decisions about course selection.

The following links are for the handouts that students would have been given in person. Individual Credit Counselling summaries will be distributed to students when we return to the building. In the meantime, myBlueprint does have student course and grade information, as well as the ability to track graduation requirements. Quad 2 report cards may also have information about tracking to graduation requirements for each student.

Grade presentation links:
