

Gr 11 Visual Arts (AVI 3M)

This course focuses on introducing you to a variety of art materials and art making methods, teaching you the steps in how to use them. There is a mix of technical assignments for building up your skills, and more open-ended creative assignments where you get to choose your style and what kind of art you want to create.

This course helps students to build on what you've learned in a Grade 9 or 10 art course ... try new art materials, in a space where you can make art ... learn the steps and tricks that artists have developed, to make the images you want to make
