

# Gr 12 Visual Arts (AVI 4M)

**This course focuses on** creating artworks using materials of your choice, with a lot of creative freedom to choose the style and content of what you want to make. Your teacher introduces you to design tricks and different ways to communicate your ideas, and then you get to choose what you want to make with these new skills

If you want to, you can focus in on mastering one art material or style that you really want to use (*hands-on, or digital if you can bring your own laptop/tablet*)... or, if you want to choose different materials or styles for each artwork, you could do it that way

**This course helps students to** prepare for the next step as an artist, or complete their experience in high school art courses... to learn the advanced tricks that artists use to make their artworks stand out ... create a series of artworks, with the guidance of a teacher to help you explore what artistic skills you really want to develop

*Mural Painting ... in this Gr 12 Art course we create a mural as a permanent artwork for Mac's hallways*
