Course Description:

Grade 10: This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Curriculum Strands/Categories:

The expectations for music courses are organized into three distinct but related strands:

1. **Creating and Presenting:** Creative work involves the practical application of skills and knowledge of theory as they relate to performance and composition. Students will perform, individually and in ensembles (e.g., using voice, band instruments, string instruments, guitar, keyboards, or other performance media). They will perform notated or improvised music and compose or arrange music, demonstrating technical skills and applying current digital technologies where appropriate.
2. **Reflecting, Responding, and Analysing:** Using the critical analysis process (see pages 16–20) to analyse and reflect on different types of music enables students to develop a deeper understanding of themselves and the communities in which they live. Analysis involves listening to live or recorded performances from a range of cultures to understand the language of music, its historical and cultural context, and how effectively its composers and performers communicate to their audience. Students also explore how music reflects and affects the societies in which it was created
3. **Foundations:** This strand involves learning the symbols, concepts, and conventions used in music. Students also develop the vocabulary necessary for discussing and evaluating music. This foundational study helps them understand and appreciate different musical forms as well as ethical issues and musical etiquette.
