

Rolph Road Elementary School

After-School Art Classes in 2024-2025 (CCSA)

Our Art Club for grades 4-6 features five engaging modules: Painting, Sculpting, SciArt, Drawing, and Architecture, each designed to foster creativity and artistic skills. In Painting, students will learn to express themselves through color and composition. Sculpting will allow them to create three-dimensional artworks using various materials. SciArt combines art with science, encouraging exploration of scientific concepts through creative projects. Drawing focuses on enhancing students' skills with lines, shapes, and forms. Architecture introduces them to the basics of design and spatial thinking. Join us on Wednesdays for an artistic adventure that nurtures creativity and sparks the imagination!
