Drop Off & Pick Up at Roywood PS

Please be aware that the school parking lot is for busses and staff only. There is lots of space in the cul-de-sac for families to park when dropping off and picking up children from school.

Roywood PS is home to many students who ride the bus to and from school and we need the parking lot clear for the busses to enter and exit safely. We also have families that need to park in the accessible parking spaces, so please make sure to keep them clear.

Thank you for your understanding and cooperation!

We will now be monitoring the entrance way of the driveway and parent volunteers will be helping out. Thank you for understanding.

Parking & Traffic Control Volunteers Requested

Thank you to those who are currently volunteering to help keep the Roywood community safe! :)

Appreciation

Thank you to all the families for your continued support with the Roywood parking lot. When the family cars stay out of the parking lot, the busses are able to smoothly come in and out and the students are able to get into school and off to their home in a timely manner.

Now that the weather is getting warmer, we encourage walking your children to school. It is a healthy habit, gives you time to talk and reflect on your day and helps to make your muscles strong!

School Improvement Planning @ Roywood PS

Literacy Goal:

Through a structured literacy approach in Kindergarten to Grade 1 and a deeper application of the comprehensive literacy program in Grades 2-5, the students of Roywood will develop their confidence in decoding and comprehending texts at or above their expected grade level. We will focus on the most underserved students. Teachers will learn how to use phonological and phonemic screeners to develop instruction based on early reading needs. We will monitor three times a year using DRA and ongoing running records.

Math Goal:

By implementing evidence based numeracy strategies (high-impact instructional practices), we will improve student engagement, learning, and attitudes towards math. To accomplish this, we will support teachers to make instructional choices that help to eliminate disproportionate outcomes and to interrupt oppressive practices (e.g. provide explicit needs-based professional learning opportunities such as "Building Foundational Math Skills in the Early Years" and "Building Thinking Classrooms in Mathematics Through an Anti-Oppressive Lens", work with Math Learning Partner, etc.)
