

ICS20

Introduction to Computer Studies

The course introduces students to computer programming. Students will plan and write simple computer programs by applying fundamental programming concepts, and learn to create clear and maintainable internal documentation. They will also learn to manage a computer by studying hardware configurations, software selection, operating system functions, networking, and safe computing practices. Students will also investigate the social impact of computer technologies, and develop an understanding of environmental and ethical issues related to the use of computers.

Topics:

- Hardware Components
- Software Products
- Operating Systems
- Home Computer Networking
- Maintenance and Security
